Professional Air Tools in Cyprus: Local Access to High-Performance Equipment

Precision and Power, When You Need It

In demanding work environments, air tools offer a level of control and efficiency that electric alternatives often can't match. Whether you're tightening bolts on a construction site, cutting through metal in a fabrication workshop, or handling repetitive work in an auto repair setting, air tools are built for speed, durability, and precision.

At Psilos Group, we supply industrial-grade air tools to businesses across Cyprus, ready for immediate use, backed by expert service, and available when your job demands more than off-the-shelf solutions. With local availability and fast response times, we ensure that when you search for air tools near me, you're not just finding stock, you're finding a partner you can trust.

Built for Demanding Worksites: Air Compressors That Deliver

When precision, performance, and uptime matter, off-the-shelf solutions won't cut it. Businesses across Cyprus turn to Psilos Group for access to professional-grade air compressors and air tools, designed to meet the needs of industrial, automotive, and construction environments.

Each compressor we offer is selected for its long-term durability, energy efficiency, and consistent output under pressure. Whether you're setting up a permanent workshop or powering pneumatic tools on-site, we supply solutions that keep operations moving.

▸ AIR STATION – 45-55

A robust, oil-filled screw compressor engineered for smooth and economical operation in industrial settings.

- Energy-efficient motor and microprocessor control for optimized performance
- Low oil carry-over (≤ 3 mg/m³) with a highly effective separation system
- Easy access for maintenance via front panel service points

Ideal for businesses that require clean, continuous air in demanding environments such as manufacturing, production lines, and processing plants.

▸ Nuair Electric Compressor N7TC801NUA

A powerful three-phase unit built for high-demand commercial use.

- 500 L tank, 7.5 HP motor, max pressure 11 bar, 840 L/min flow rate
- Two-stage belt-driven pump reduces heat and increases longevity

- Anti-vibration feet and noise-reducing intake filter improve workplace safety and comfort

Perfect for mechanical workshops, garages, and light industrial applications.

▶ Atlas Copco Portable Compressors

We supply a range of mobile compressors by Atlas Copco, a global leader in compressed air technology. Models include:

- XAS 138, XAS 186, XAS 286, and XAHS 237
- Compact, towable designs for site flexibility
- Exceptional reliability and fuel efficiency for long workdays in the field

Trusted by construction firms, infrastructure contractors, and rental fleet operators who need performance on the move.

Common Applications Across Industries

Air tools and compressors are essential in many sectors. Psilos Group supports professionals working in:

- Construction – Powering jackhammers, nailers, and concrete cutting tools
- Automotive – Supporting spray painting, tire inflation, and impact tools
- Metalwork & Fabrication – Running grinders, sanders, and cutting equipment
- Workshops – Providing clean, continuous air for tool benches and installations
- Facility Maintenance – Operating cleaning tools, air blowers, and backup systems

By providing tailored equipment recommendations and quick delivery, we help businesses in Cyprus reduce setup time, improve safety, and get the job done right.

Full Support. No Guesswork.

At Psilos Group, we believe in more than just supplying equipment—we provide a complete support system. That includes:

- Expert Consultation – Helping you choose the right compressor for your application
- Installation & Setup – Ensuring safe, efficient integration with your tools or workspace
- Maintenance & Repairs – On-site diagnostics, regular servicing, and fast spare part access
- Parts & Accessories – Browse our stock of hoses, regulators, and system components

Our technicians are trained to respond quickly across Cyprus, minimizing downtime and supporting long-term productivity.

Key Takeaways for Businesses in Cyprus

Choosing the right air compressor or pneumatic tool setup can dramatically impact your operational efficiency and workplace safety.

Planning ahead means:

- Matching air volume and pressure to your specific tools
- Ensuring system compatibility and professional installation
- Maintaining consistent airflow to prevent performance issues
- Accessing service and parts from a trusted local provider

Whether you’re upgrading your equipment or starting a new job site, Psilos is your local partner for performance-ready air systems.

Safety First: Best Practices for Air Tool Use

While air-powered tools are known for their performance and durability, proper handling is essential to ensure a safe and efficient work environment.

To get the most out of your equipment—and protect your team—always follow these core safety practices (OSHA, 2002):

- Check Your Connections: Inspect hoses, fittings, and couplers before each use. A loose connection or damaged line can cause sudden pressure loss or dangerous hose whip.
- Use the Right PPE: Eye protection is non-negotiable. Depending on the tool, hearing protection, gloves, and respirators may also be necessary—especially in enclosed or dusty environments.
- Regulate Air Pressure: Never exceed the tool's rated PSI. Over-pressurizing can damage components and pose serious safety risks.
- Disconnect Before Maintenance: Always shut off air supply and release residual pressure before cleaning, changing accessories, or servicing equipment.
- Avoid Misuse: Never point compressed air at yourself or others. Even low-pressure air can cause serious injury when used incorrectly.

At Psilos Group, safety is part of the solution. We don't just supply air tools—we help ensure they're operated with confidence, care, and compliance.
